

Pumps for water & sewage applications

WATER & SEWAGE RANGE

The Water & Sewage Range is specifically designed for sewage and waste water applications.

With an innovative design, these units are capable of pumping large solids of up to 110mm [4.3 inch].

These pumps chop and shred debris and other stringy materials that would normally cause clogging. All pumps are available with either compressor, vacuum, or diaphragm priming systems.

Delivery & heads

- Models range from 4 inch to 12 inch connections
- Covering suction lift up to 9 m
- Covering head up to 60 m
- Covering flow up to 470 L/sec

AT A GLANCE

- Heavy duty, robust design
- Large solids handling
- Cutter pockets
- Inspection cover
- Non-clog impeller
- Shredder claw
- Available in Standard (SR) and Acoustic (AR) build configurations

APPLICATIONS

- Water & Sewage
- Construction & Civil
- Industrial
